

**MANUFACTURING & TRANSPORT FACULTY**

20 November 2013

To the Directors of Duromer Products

I am writing to thank you for your generous donation of polymer materials to the Polymer section at Lidcombe College, South Western Sydney Institute, which our students are using to injection mould plates and bowls which will in turn be donated to the Exodus Foundation for their Christmas Day Lunch.

Your donation of 750kg of polypropylene together with a quantity of masterbatch will allow our students, as part of their practical exercises, to produce 3000 each of the above mentioned bowls and plates, which Exodus will be able to use long after their initial use on Christmas Day. It will allow them to focus their resources on their primary goal, feeding the homeless, rather than on the supply of these items.

Again, thank you from TAFE and the Exodus Foundation.

Yours sincerely

**Stephen Dawkins**

Head Teacher | Manufacturing and Transport Faculty/Polymers Section

TAFE NSW – South Western Sydney Institute
